VPC DISCUSSION:

No members of the public registered to speak on this item.

Nick Wood, representing the applicant with Snell & Wilmer introduced himself. Mr. Wood oriented the committee to the site stating that it was located on the northeast corner of 43rd Avenue and Bell Road. Mr. Wood stated that the site consisted of approximately six acres and is part of a consolidated shopping center. Mr. Wood stated his client often receives calls from apartment developers and that six acres is about the right size for a 300-unit apartment complex; however, the owner wishes to keep the center as commercial while revitalizing the center. Mr. Wood stated that they discussed the option of C-2, which allows a large number of uses. Mr. Wood highlighted the neighboring properties and stated that during their initial neighborhood meeting, twentyfive to thirty people attended and expressed concerns over the potential for apartments and the loss of the shopping center. Mr. Wood stated that the proposed PUD includes a list of prohibited uses and described the uses that are currently on the property. Mr. Wood outlined the General Plan Land Use designation and that the current PSC zoning was approved in 2004 and is an archaic zoning designation. Mr. Wood presented the site data as well as a comparison between the existing and proposed zoning standards stating that the existing setbacks adjacent to the existing residential are being maintained while the setback along Bell Road is increasing. Mr. Wood stated that C-2 would have given them more flexibility with more permissive development standards and would have allowed 14.25 dwelling units per acre. Mr. Wood stated that multifamily is a prohibited use under the PUD and highlighted the prohibited uses.
