ATTACHMENT E

To Whom it May Concern,

I SUPPORT the Property Reserve Inc. park development project located on 116.5 acres north of the northwest corner of 67th Avenue and Lower Buckeye Road in Phoenix. We support this high-quality proposal, including the rezoning and general amendment plan (z-3- 84 and GPA-EST-2-24).

The existing zoning for the Property has been carried over from the time of annexation into the City of Phoenix. It was a holding pattern until development occurred similar to the S-1 District. The proposal request facilitating development of current property to create a high-quality speculative commerce park development which would include 4 flex buildings with a cumulative space of 1.8 million square feet of shell warehouse space. These flex buildings will be divided to accommodate smaller tenants' suites, this would address the dynamic need for small and larger tenant and employer spaces. Consistent to CP/GCP regulations, the maximum height for each building is set at 56 feet tall.

The design of the buildings is eye-catching and includes large windows along with a mint green entryway that welcomes you to the property along with the mesquite trees and cacti surrounding the lot. In addition, the proposal is to provide the area with new, high quality employment opportunities in a way which is consistent and mindful of the area's land use pattern. This will provide the area with more employment and business opportunities along with the ability to create space for warehouses which are common in the area.

I am in full support of the Property Reserve Inc. project and am excited to see this development revitalize the neighborhood and surrounding area with multiple opportunities.

These flex buildings will be divided to accommodate smaller tenants' suites, this would address the dynamic need for small and larger tenant and employer spaces. Consistent to CP/GCP regulations, the maximum height for each building is set at 56 feet tall.

The design of the buildings is eye-catching and includes large windows along with a mint green entryway that welcomes you to the property along with the mesquite trees and cacti surrounding the lot. In addition, the proposal is to provide the area with new, high quality employment opportunities in a way which is consistent and mindful of the area's land use pattern. This will provide the area with more employment and business opportunities along with the ability to create space for warehouses which are common in the area.

I am in full support of the Property Reserve Inc. project and am excited to see this development revitalize the neighborhood and surrounding area with multiple opportunities.

FEB 20 2024

I SUPPORT the Property Reserve Inc. park development project located on 116.5 acres north of the northwest corner of 67th Avenue and Lower Buckeye Road in Phoenix. We support this high-quality proposal, including the rezoning and general amendment plan (z-3- 84 and GPA-EST-2-24).

The existing zoning for the Property has been carried over from the time of annexation into the City of Phoenix. It was a holding pattern until development occurred similar to the S-1 District. The proposal request facilitating development of current property to create a high-quality speculative commerce park development which would include 4 flex buildings with a cumulative space of 1.8 million square feet of shell warehouse space. These flex buildings will be divided to accommodate smaller tenants' suites, this would address the dynamic need for small and larger tenant and employer spaces. Consistent to CP/GCP regulations, the maximum height for each building is set at 56 feet tall.

The design of the buildings is eye-catching and includes large windows along with a mint green entryway that welcomes you to the property along with the mesquite trees and cacti surrounding the lot. In addition, the proposal is to provide the area with new, high quality employment opportunities in a way which is consistent and mindful of the area's land use pattern. This will provide the area with more employment and business opportunities along with the ability to create space for warehouses which are common in the area.

I am in full support of the Property Reserve Inc. project and am excited to see this development revitalize the neighborhood and surrounding area with multiple opportunities.

I SUPPORT the Property Reserve Inc. park development project located on 116.5 acres north of the northwest corner of 67th Avenue and Lower Buckeye Road in Phoenix. We support this high-quality proposal, including the rezoning and general amendment plan (z-3- 84 and GPA-EST-2-24).

The existing zoning for the Property has been carried over from the time of annexation into the City of Phoenix. It was a holding pattern until development occurred similar to the S-1 District. The proposal request facilitating development of current property to create a high-quality speculative commerce park development which would include 4 flex buildings with a cumulative space of 1.8 million square feet of shell warehouse space. These flex buildings will be divided to accommodate smaller tenants' suites, this would address the dynamic need for small and larger tenant and employer spaces. Consistent to CP/GCP regulations, the maximum height for each building is set at 56 feet tall.

The design of the buildings is eye-catching and includes large windows along with a mint green entryway that welcomes you to the property along with the mesquite trees and cacti surrounding the lot. In addition, the proposal is to provide the area with new, high quality employment opportunities in a way which is consistent and mindful of the area's land use pattern. This will provide the area with more employment and business opportunities along with the ability to create space for warehouses which are common in the area.

I am in full support of the Property Reserve Inc. project and am excited to see this development revitalize the neighborhood and surrounding area with multiple opportunities.
