## The Community Spread Benchmarks

ADHS defines community spread levels with the weekly thresholds outlined below:

Benchmarks	Minimal	Moderate	Substantial
Cases	< 10 cases/100k	10-100 cases/100k	> 100 cases/100k
Percent Positivity	< 5%	5-10% *	> 10%
COVID-like Illness	< 5%	5-10%	> 10%

Testing Positivity in Maricopa County

The following information is reported by the Arizona Department of Health Services COVID-19 Dashboard for laboratory testing. The data has been filtered to depict to its lowest jurisdictional level, in this case Maricopa County, and reported on 09/29/2020.

Reopening Benchmarks

Arizona Department of Health Services has established three specific community benchmarks to determine the risk to COVID-19. The results are updated weekly using a dashboard created by Maricopa County Department of Public Health and maintained on their website. The dashboard can be filtered by School District, City or Zip Code

The benchmarks established for each level are:

- Daily cases per 100,000 people
- Percentage of Positive Tests (Positivity)
- COVID-Like Illnesses in Hospitals

The following Dashboard information was filtered to depict the benchmarks for the City of Phoenix as follows:

Report created on 09/29/2020 3:14 PM for city: PHOENIX	
Overall Risk Level is:	
Moderate	
Recommended Learning Scenario is:	
Hybrid w/ onsite support	
Benchmarks	
Most Recent Data [1]	
Cases Per 100k People	29.26843197
Percent Positivity	4.81%
Covid-Like Illness	2%
Prior Weeks Data [2]	
Cases Per 100k People	35.0983229
Percent Positivity	4.74%
Covid-Like Illness	2%
