Email 2

The buildings that have their backyard to Fry's will have high noise due to the unloading of the trailers.

There is a bus stop at the entrance to this development. With the entrance and exit so close to it and along with the main exit of Fry's, the bus will be delayed daily. Lots of handicapped individuals use this route and the proximity of all the entrances will make it a nightmare. This lot is used by many on picadilly to get to essential food and services. This development would block pedestrian access from picadilly.

I am currently watching online. I am a resident who has a strong rejection to this idea and hope that this email is accepted.

This is a busy intersection.

Making a left onto Indian school road is difficult enough and compound that with the entrance/exit to a residential development will back up traffic for miles.

The crime is very high here along with transients. The business at the front of this residential will cause a lot of people
