Maricopa County Zoning Case History: None.

### ALTERNATIVES:

- Option A - Annex the land as requested:

The City of Phoenix will control rezoning requests in this area to ensure conformance with the General Plan Land Use Map. The city of Phoenix will capture property tax, utility tax, state shared revenue, and impact fees when applicable.

- Option B - Deny the request for annexation:

If annexed later, this site would have been developed under County zoning and development standards that may not be consistent with the General Plan, Land Use Map, zoning, and development standards.

### RECOMMENDATION:

Located adjacent to City of Phoenix lands, this annexation is supported by the 2025 General Plan, particularly the Land Use goal for land uses and development standards for unincorporated land, under Policies 1 and 2. This annexation is recommended for approval. Approval of annexation does not constitute recommendation for future rezoning actions.

### SUPPORTING INFORMATION:

Significant infrastructure improvements will be (or may be) required in order to serve the proposed parcels within the City of Phoenix service area. Design and construction of any infrastructure will be the responsibility of the developer. Specifics regarding infrastructure improvement requirements would be discussed and determined at a pre-application meeting after annexation. Additional information and requirements provided under PAPP 2403641 for KIVA 24-898.

It is the City's intent to provide water and sewer service. However, the requirements and assurances for water and sewer service are determined during the site plan

application review, or the building permit approval, and may be subject to future restrictions as a result of water shortage. Water and/or sewer system requirements and stipulations are determined at time of site plan approval. Capacity on any existing infrastructure is determined at that time of preliminary site plan approval. Please be advised that capacity is a dynamic condition that can change over time due to a variety of factors.

Per City Code 37-22, 37-39 and 37-142, annexation into the City requires all properties connect to the City's public water system. All existing on-site private wells must be disconnected to prevent cross contamination with the City's public water system.

Developments that use an average of 250,000-gallons of water or more per day are required to provide a Water Conservation Plan. In addition, developments that use an average of 500,000-gallons of water or more per day are required to demonstrate a minimum of 30% water reuse in the Water Conservation Plan. The Water Conservation Plan must be reviewed and approved by the Water Services Department (WSD) prior to preliminary site plan approval.
