

Report

Agenda Date: 6/6/2018, **Item No.** 45

McKesson Medical-Surgical Minnesota Supply, Inc.

For \$20,000.00 in payment authority to purchase an exercise cardiac stress treadmill system, known as the ECG Quinton Q-Stress TM55, for the Phoenix Fire Department Health & Wellness Center. This equipment is utilized to perform mandatory annual 12-lead ECG stress testing for firefighters. The exercise cardiac stress test is a crucial diagnostic portion of a firefighters annual mandatory Occupational Safety and Health Administration physical fitness exam. It evaluates cardiac performance, detects early signs of heart disease, and allows the department to track vital information needed for clinicians to help maintain firefighter's health.
